DETAILED ACTION

Claim Objections

1. Claim 10 is objected to because of the following informalities: on line 10, "on" should be changed to "one". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10-11, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0720816A1.

EP 0720816A1 teach a method of making sausage by extruding a meat strand out of a tube (Figure 1, #2 & 12), separating the meat into a linear fiber portion and random fiber portion (Figure 2, #6 & 8), separating the strand into links (column 5, line 11), applying heat to curve the links (column 6, lines 5-10), heating via hot air (column 5, line 26), and heating via liquid smoke which inherently contained water (column 6, line 59).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1761

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12, 14, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0720816A1.

EP 0720816A1 teaches the above mentioned concepts as well as heating at 50-95°C (column 5, line 26). EP 0720816A1 does not recite frying, steaming, or microwaving. It would have been obvious to one of ordinary skill in the art to heat the sausage of EP 0720816A1 via frying, steaming, and microwaving since EP 0720816A1 already taught heating via different modes such as hot air and liquid smoke (column 5, line 26; column 6, line 59) and since frying, steaming, and microwaving were all commonly known methods of heating foods such as sausage.

Allowable Subject Matter

6. Claims 1-9 are allowed.

7. The following is an examiner's statement of reasons for allowance: the method of creating curved sausage links of independent claim 1 defines over the prior art of record since the prior art does not teach, suggest, nor render obvious partially restricting the flow of meat over and past a restriction element creating a first portion with linear fibers that gradually transitions to a second portion with random fibers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

8. Applicant's arguments filed December 29, 2003 have been fully considered but they are not persuasive.

Applicant argues that EP 0720816A1 does not teach extruding a single sausage and then separating the linear and non-linear portions. However, EP 0720816A1 clearly illustrates this concept in Figure 1 where the strand is separated into linear and non-linear portions.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
